M. NASIF HASAN NOOR

Software Engineer

Location: Dhaka, Bangladesh.
E-mail: nasif.workstation@gmail.com
Portfolio: https://nasifh.vercel.app
Mobile: +8801626858697

ABOUT ME:

5+ years of experience crafting high-performance, scalable web applications with **React, Next.js, TypeScript, and Angular**. Working with **Node.js, Express.js, and NestJS** to build full-stack features. Experienced in developing reusable component architectures, optimizing performance, and integrating RESTful APIs. Focused on writing clean, maintainable code and delivering reliable solutions in agile environments, with a strong interest in continuously adopting modern web technologies.

PROFESSIONAL DETAILS:

- **Lecture Publications Ltd.**
  Software Engineer (September 2026 to present.)
  Key responsibilities:
  - Designed and built RESTful APIs with NestJS and PostgreSQL schemas to power core ERP functionality.
  - Built modules for book inventory/stock tracking and distribution workflows.
  - Collaborated directly with business stakeholders to translate manual, paper-based workflows into the ERP system.
- **Golden Harvest InfoTech Ltd.**
  Software Engineer (April 2024 to August 2026)
  Assistant Software Engineer (April 2023 to March 2024)
  Junior Software Engineer (February 2022 to March 2023)
  Intern (October 2021 to January 2022)
  Key responsibilities:
  - Developed web applications and RESTful APIs using React.js, Next.js, Angular, and NestJS, focusing on scalability and performance.
  - Designed reusable UI components and optimized rendering/API interactions for faster, responsive interfaces.
  - Conducted code reviews (PR reviews) to maintain code quality and consistency.

EDUCATIONAL QUALIFICATIONS:

- **M. Sc. In CSE, PMSCS, Jahangirnagar University (JU)**
  CGPA: 3.23 out of 4.00 | Passing Year: 2023
- **B. Sc. In CSE, American International University- Bangladesh (AIUB)**
  CGPA: 3.74 out of 4.00 **|** Passing Year: 2021.

SKILLS:

- **Frontend**: React, Next.js, Angular, TypeScript, JavaScript (ES6+), HTML5, CSS3, Bootstrap, Tailwind CSS, Material UI.
- **State Management:** Redux, Context API.
- **Backend:** Node.js, Express.js, NestJS.
- **Database:** MongoDB (Mongoose), PostgreSQL, MySQL.
- **APIs:** REST APIs, GraphQL (familiar with concepts and basic integration).
- **Authentication & Authorization:** JWT, RBAC, ABAC.
- **Tools:** Git, GitHub, VS Code, Figma, Postman, Swagger, Browser Developer Tools.
- **AI-assisted development:** Cursor, Claude Code, GitHub Copilot.

PROJECTS:

- **In-House ERP System - Lecture Publications**

  Overview: An in-house enterprise resource planning system built for Lecture Publications Ltd. to digitize and manage core publishing-business operations. Played a primary development role across both frontend and backend, covering modules such as Inventory/Stock Management, Sales & Order Processing, and User & Role Management, ensuring efficient tracking of books, orders, and internal business workflows.

  Tech Stack: React, NestJS, PostgreSQL, Tailwind CSS.

- **MHS - Memorial Houston Medical**

  Overview: An enterprise-grade healthcare management platform built on **microservices** architecture. Played a primary development role in the platform's most critical modules including Auth, Electronic Health Records (EHR), Patient Information System (PIS), and User Information System (UIS), ensuring secure role-based access and efficient management of users, patient records, and hospital operations.

  Tech Stack: Next.js, FastAPI, Spring Boot, PostgreSQL, Material UI, Tailwind CSS.

- **Curation Keying Audit Portal - Family Search**

  Overview: An audit and monitoring portal developed for **FamilySearch International**, the world's largest genealogy organization, managing over 8 billion historical records across 140 countries. The system was engineered to handle millions of genealogical records, track data changes with precision, and generate detailed compliance reports to ensure data accuracy and transparency at scale.

  Tech Stack: Angular, Spring Boot, FastAPI, PostgreSQL, Bootstrap, JasperReports.

- **BSCL Billing System**

  Overview: A national-scale billing and revenue management system for **Bangladesh Satellite Company Limited (BSCL)**, managing financial operations for all national TV channels and broadcasters. Played a primary frontend development role for core modules, including automated invoicing and financial analytics dashboards.

  Tech Stack: Angular, Spring Boot, Bootstrap, MySQL, Angular Material, JasperReports.
